LEADERSHIP TEAM

Mr. Bach Raj Lohia: Founder & Chairman

A dynamic entrepreneur with an enchanting personality whose vision and creative imagination translated Eagle Hunter to become the largest transnational Indian company in the field of security services industry across the continents. Mr. B.R Lohia is the recipient of Udyog Gaurav Award for the year 1995 given by All India organizational Entrepreneurial confederation in recognition of his outstanding services to security/ manpower, method management and excellence in the chosen field of activity. His business interests are spread across a variety of activities, including but not limited to security, facility management, waste management, education, hospitality and real estate. It was under his far-sighted guidance and leadership the company witnessed a phenomenal and steady growth. Mr. Lohia has been a social activist and has been involved in CSR/ and skill development programs across India, where we train people from being unskilled and upgrade their skills and give them opportunity to work in reputed companies, his works all along and has been contributing towards the betterment of society in his own ways for the past many years. Union handling and government liasoning in central and state governments is another positive attribute of Mr. B.R. Lohia, because of his ground connections and his grass root working experience

Mr. Anand Shukla: Additional Director EHSL

A pragmatic Human Resource Strategist and Business Transformation Leader with over 35 years of diverse, cross-industry experience across FMCG, Consumer Durables, Manufacturing, Alcoholic Beverages, and Infrastructure. Passionate for driving pivotal growth, operational excellence, and sustainable success, have led organizations across India, Indonesia, UAE, and Africa through large-scale business and cultural transformations. As a certified Executive Coach and an alumnus of Harvard Business School's Advanced Management Program, he blends global perspectives with a unique combination of HR expertise and business acumen. As a dynamic leader with a P&L mindset, he has successfully helmed strategic initiatives, including one of India's largest acquisitions in the beverage sector. His ability to translate vision into action has driven double-digit growth, optimized operations, and enhanced customer satisfaction across industries. Adept at market expansion, business development, and cross-functional leadership, he thrives on solving complex challenges with clarity and agility. His leadership is marked by tangible outcomes: streamlined processes that reduced costs, innovative solutions that improved efficiency, and high-performing teams that delivered measurable results.

Ajay Lohia: Joint Managing Director EHSL

MBA finance from Wales, UK; Ajay Lohia is in command since 2010 and has been successfully running the facility management wing at Eagle Hunter Facility Management services (EH-FMS) for many years. In 2016 he joined as the CEO at EHSL, since then the Company has witnessed an impressive growth across all verticals. His vision, fresh & innovative approach and strong business ethics have by far carved his success story. His visionary leadership, innovative approach, and strong business ethics have significantly contributed to his success. My core competencies include new business development, department reorganization, organizational leadership, and strategic planning and policy formulation. I work in sync with the founder, board of directors, and dedicated employees of EHSL to deliver business-critical results driven by ethical business practices, social responsibility, and innovation. I have successfully resolved complex business challenges, increased revenue generation, and created an environment where employees and business associates can meet their highest potential and deliver growth-oriented results. I am passionate about empowering and enabling our clients and stakeholders to achieve their goals and objectives.

Abhay Kumar Singh: Director – International Business

Abhay Kumar Singh is a well-known international professional with over 18 years of broad experience in strategy, sales and marketing, operations, merchandising, team management, P&L management, buying, and stakeholder relations. His expertise covers several industries, including retail, supply chain management, fintech, construction, project management, security, training, and recruitment. He has worked in both public sector organizations (like WAPCOS and NSDC) and private companies (such as Chalhoub, Apparel Group, and Spendwisor). Currently, he is the Director of international placement at Eagle Hunter, managing the international business for the group companies. With a BTech from NIT Trichy and an MBA from Singapore/ Dubai, he is a successful professional known for his attention to detail and ability to achieve goals with limited resources.

EAGLE HUNTER

DISASTER MANAGEMENT SERVICES

READY FOR ANYTHING-ANYTIME

OVERVIEW

Our Vision is to relentlessly pursue technological innovation and excellence for the seamless disaster management to benefit of humanity, environment and the earth. To become the preferred & trusted business partner by investing in people, technology, partnerships in disaster management, driving resilience and swift recovery for communities and businesses worldwide.

Our Mission is to become trusted partner of our business associates and dedicated to deliver disaster management solutions that protect lives, assets, and communities through rapid response, preparedness, and recovery, helping businesses and individuals rebuild stronger in timely manner with a focus on sustainable best practice while keeping at par with international standards.

Eagle Hunter Solutions Limited has a highly responsive, well-trained, and responsible team of professionals ready to manage the humanitarian aspects of any emergency. Our team is focused on minimizing the harmful after-effects of natural or man-made disasters by analyzing the situation and developing a recovery plan that includes necessary precautions. This plan also addresses business continuity and process needs, with a strong focus on preventing future disasters.

A serious disruption of the functioning of a community or society, which involve widespread human, material, economic or environmental impacts that exceed the ability of the affected community or society to cope using its own resources. Disaster management is how we deal with the human, material, economic or environmental impacts of said disaster, it is the process of how we “prepare for, respond to and learn from the effects of major failures”

The combination of hazards, vulnerability and inability to reduce the potential negative consequences of risk results in disaster ^[3].
(Vulnerability+ Hazard) / Capacity = Disaster

Emergency management (also disaster management) is a science and a system charged with creating the framework within which communities reduce vulnerability to hazards and cope with disasters. Emergency managers think of disasters as recurring events with four phases: Mitigation, Preparedness, Response, and Recovery.

Impacts. A natural disaster may cause loss of life, injury or other health impacts, property damage, loss of livelihoods and services, social and economic disruption, or environmental damage.

Our Chairman and Founder emphasizes on 4Ps of emergency response: Predict, Plan, Prepare, and Practice are committed to fostering the four Cs: communication, coordination, collaboration, and cooperation.

BE SMART BE PREPARED
ANYTHING-ANYTIME

READY FOR ANYTHING-ANYTIME

AGENCIES INVOLVEMENT

The Disaster Management Act of 2005 defines Disaster Management as an integrated process of planning, organizing, coordinating and implementing measures which are necessary for-

- Prevention of threat of any disaster
- Reduction of risk of any disaster or its consequences
- Readiness to deal with any disaster
- Promptness in dealing with a disaster
- Assessing the severity of the effects of any disaster
- Rescue and relief
- Rehabilitation and Reconstruction

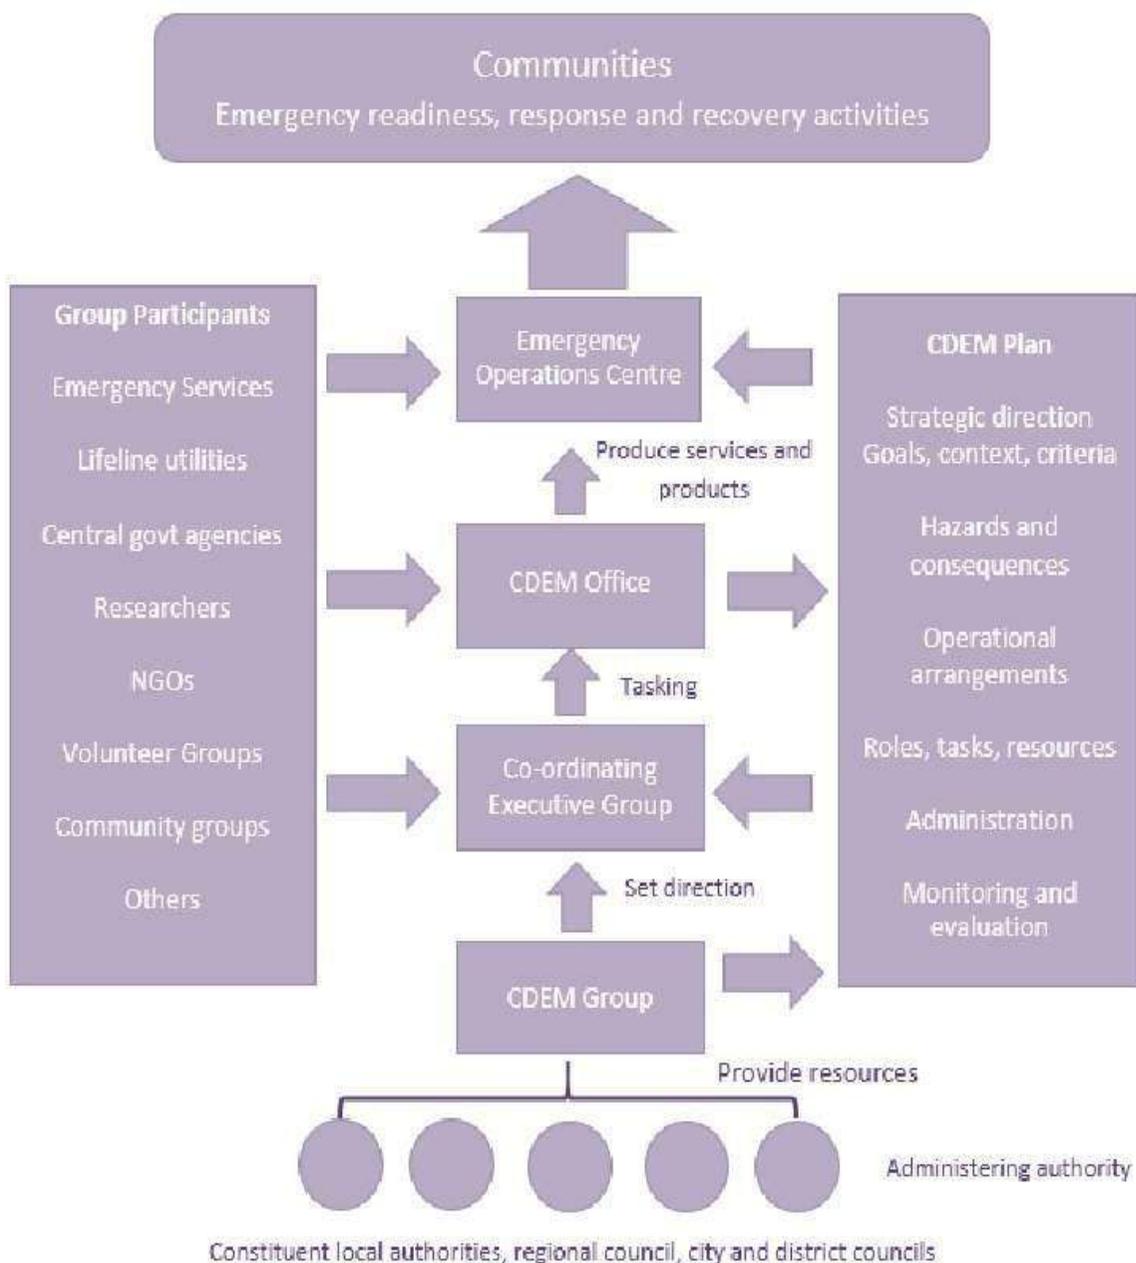

Agencies involved in Disaster Management

- **National Disaster Management Authority (NDMA):-** NDMA, is an apex body for disaster management, headed by the Prime Minister of India. It is responsible for the supervision, direction, and control of the National Disaster Response Force (NDRF).
- **National Executive Committee (NEC):-** The NEC is composed of high profile ministerial members from the government of India that include the Union Home Secretary as Chairperson, and the Secretaries to the Government of India (GoI) like Ministries / Departments of Agriculture, Atomic Energy, Defence, Drinking Water Supply, Environment and Forests, etc. The NEC prepares the National Plan for Disaster Management as per the National Policy on Disaster Management.
- **State Disaster Management Authority (SDMA):-** The Chief Minister of the respective state is the head of the SDMA. The State Government has a State Executive Committee (SEC) which assists the State Disaster Management Authority (SDMA) on Disaster Management.
- **District Disaster Management Authority (DDMA):-** The DDMA is headed by the District Collector, Deputy Commissioner or District Magistrate depending on the situation, with the elected representatives of the local authority as the Co-Chairperson. The DDMA ensures that the guidelines framed by the NDMA and the SDMA are followed by all the departments of the State Government at the District level and the local authorities in the District.
- **Local Authorities:-** Local authorities include Panchayati Raj Institutions (PRI), Municipalities, District and Cantonment 11 Institutional and Legal Arrangements Boards, and Town Planning Authorities which control and manage civic services.

KEY ORGANIZATIONS & PHASES OF EMERGENCY MANAGEMENT

Key organisations and their relationships in disasters and emergencies

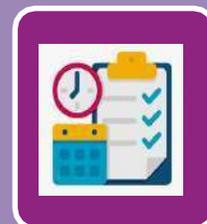

The following diagram illustrates the relationship of the four phases of emergency management.

Phase 1 : Mitigation

- Public education
- Awareness
- Hazard assessment
- Vulnerability assessment
- Improved infrastructure

Phase 2: Preparation

- National emergency
- Telecommunication & response plans
- Early warning
- Standard operating procedures

Phase 3: Response

- Emergency
- Communication
- Co-ordination
- Saving lives

Phase 4: Recovery

- Reconstruction of infrastructure
- Restoring telecommunication
- Improving lives
- Rehabilitation of other necessities & services

STANDARD OPERATING PROCEDURES

A Standard Operating Procedure has been prepared for alerts of events of different types and identifies the situations when alerts are to be sent by the IOC. Specific hazards have different categories of alerts. Accordingly, a uniform system has been devised by categorizing each type of alert in stages – Yellow, Orange and Red

SOPs cover the following aspects:

- Official on duty who detects the incident first will inform the control rooms functional round the clock and control room in turn will further inform immediately to NDRF/SDRF, local authorities like local police, fire brigade, hospitals and other local authorities. Simultaneously informing all senior officials who in turn will inform all the concerned Ministries/ Departments for seeking assistance.
- Quickly mobilize the trained security staff and volunteers to handle emergencies once the 'warning or signal' is on.
- Segregating the affected areas to avoid further damage.
- Evacuate employees and officers quickly from the office premises without any delay and in the case of colony from the affected place / premise.
- Loud-Hailer for making announcements.
- Supply of safe drinking water, water quality monitoring and improved sanitation
- Keep first aid kit ready in the welfare cell of the office and in Community Centre of the Colony.
- Ambulance equipped with life supporting system for transportation of injured / casualties.
- Prompt action including assistance from locals to evacuate stranded officials / families in operational area
- Operation and manning of the disaster control room.
- Coordination amongst various stakeholders through advance warnings.
- Communication system with backups

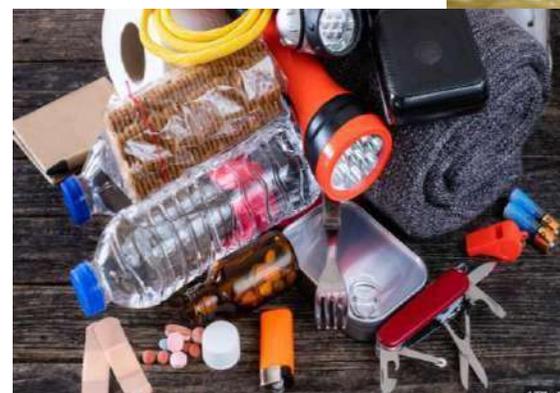

- Identify appropriate locations to set up the emergency operation camps during any disaster event
- Arrange or identify the available sources for standby generators for every contingency
- Vector control measures as a part of the overall community sanitation activities
- Sanitation of sewage and drainage systems for smooth flow of waste/ water
- Developing proper solid waste, E-waste management systems
- Develop systems of awareness generation among most vulnerable communities about various infectious diseases and their Prevention
- Arrangement for vehicles during emergencies for transport of injured persons
- Installation of suitable warning & security system.
- Maintenance of uninterrupted communication
- Create awareness among the staff about Disaster Management Plan (DMP), preparedness, DOs & DONT's during emergencies and relief measures
- Publishing contact addresses and telephone numbers of responsible authorities namely Fire Department, Police, District Collector/ Commissioner, Meteorological Dept, Hospitals etc.
- Conduct periodical inspections or safety audits to check the readiness of EMS Conducting mock exercises to ensure automatic activation of EMS in case of emergency.
- Devise continuity plans ready for quick restoration of normalcy

PREPAREDNESS

Take action today and take responsibility for being prepared.

- **Identify Your Risk** (Flood, natural or human caused disaster, chemical facility, fire, terrorism, earthquake, pandemic, landslide, cyclone, tsunami, heat wave, wild animals, forest fire, drought, heavy rainfall etc.)
- **Create a Family Disaster Plan** (where to, out-of-state “family contact”; how to get emergency information etc.)
- **Practice Your Disaster Plan** (evacuate, know the proper evacuation procedures and routes)
- **Build a Disaster Supply Kit** (Home and Car)
- **Prepare Your Children** (not to panic, about food, information, community, trust, survival instinct etc.)
- **Don't Forget Those With Special Needs** (Infants, seniors and those with special needs etc.)
- **Learn CPR and First Aid** (basic first aid and CPR)
- **Eliminate Hazards in Your Home and The Workplace** (secure the contents of your home or office to reduce hazards)
- **Understand Post-9/11 Risks** (Man-made / natural disasters - Be Informed – Explosions, Chemical, Biological, and Nuclear Threats)
- **Get Involved, Volunteer, Bear Responsibility** (Donate blood, join a Community Emergency Response Team (CERT), educate your neighbor, or volunteer)

In partnership with academic institutions, governments, international organizations and other UN agencies, Eagle Hunter contributes to facilitate the exchange of best practices, experiences and approaches to better manage disasters. The training workshop comprises two main parts: (1) Interactive lectures by resource persons who have long-standing experience in disaster risk management at regional and international levels, i.e., experts from NDMA, NEC, International Council, SDMA, UN-Habitat and the World Heritage Centre and (2) On-site workshop activities, including field exercises and various assignments adapted from the methodologies developed Eagle Hunter

The courses provide excellent opportunities to learn about the Disaster Risk Reduction under professional guidance. The training materials in the form of CDs are sent through post which may also be accessed through online course platform. The programmes include discussions, queries, clarifications, assignments and end-of-course projects which are evaluated by experienced course facilitators. Successful candidates are provided certificates jointly issued by the EGDMS and the Government.

Workshop aim to enhance the knowledge and skills of stakeholders in disaster preparedness, response, and recovery. The workshop provide participants with hands-on experience, practical training, and valuable insights into effective disaster management strategies.

Workshop Objectives: The workshop aimed to achieve the following objectives

- To raise awareness about disaster management and its significance in society.
- To equip participants with practical skills and knowledge related to disaster preparedness, response, and recovery.
- To foster a sense of responsibility and preparedness among faculty members and students.
- To provide a platform for sharing experiences, best practices, and innovative approaches to disaster management.

Workshop Structure: The workshop is structured to offer a comprehensive learning experience. It consists of the following components:

- Presentations: Informative presentations on various aspects of disaster management, including risk assessment, emergency planning, and post-disaster recovery.
- Hands-on Training: Practical exercises and simulations related to disaster response. Opportunity to handle and familiarize with various rescue equipment.
- Drills: Engagement in drill sessions to practice response strategies and coordination during emergency situations. These drills allowed to simulate real-life scenarios and develop their problem-solving skills.

Minimum Required Prerequisites:

- Familiarity with common types of disasters (natural and man-made).
- Basic understanding of emergency management principles
- General knowledge of public safety and community preparedness.
- Ability to participate in interactive engagement activities such as group discussions, simulations, and exercises.
- Proficiency in the English language for comprehension of course materials and active participation.

TRAINING AND WORKSHOP - MODULES

Corporate Disaster Management Training Course: Training course is designed to master professionals with critical response protocols for any emergency, predict and mitigate potential threats and deliver vital aid like search and rescue, first aid, and psychosocial support. This training is essential for organizations to ensure safety, continuity, and resilience. Empower your teams with expert-led on-site/in-house or virtual/online Disaster Management Training through Eagle Hunter, a premier training company for organizations globally. Our customized training program equips your employees with the skills, knowledge, and cutting-edge tools needed for success. Designed to meet your specific training needs, this training program ensures your team is primed to drive your business goals. Transform your workforce into a beacon of productivity and efficiency. Disaster Management is essential to organizational safety and risk management. This training provides a comprehensive understanding of handling emergencies, mitigating risks, and ensuring continuity. The need for such training is paramount in modern organizations to prepare for unforeseen events. The Disaster Management training course, particularly when instructor-led, offers an immersive and practical learning experience.

First Aid is immediate care of an ill or injured person before professional medical help is available. Skills are needed to take care of the 4As i.e Awareness-Assessment-Action-Aftercare of a victim for immediate assessment to reassure, restore breathing and stop bleeding. **First aid training comprises of** general first aid steps, primary and secondary assessments, CPR and application of any of the other 20 or more first aid procedures/protocols needed to deal with medical emergencies including heart attack, stroke, bleeding, spinal injury, burn, snake bites, jellyfish sting, heat and cold emergencies. Eagle Hunter offers First-aid training programmes for everyone to learn recovery and revival skills so that they can provide assistance and be first responders in case of an emergency.

Training Method – Theory + Practical + Exam, Course Duration – 12-14 Hours, Minimum Age – 15 years

Training comprises of **survival swimming lessons**, endurance swimming, rescue swimming, dry and wet lifesaving in floods, motor boat operation, IRB and OBM maintenance, rescue with rescue boat, snake handling, pathogenic diseases in floods and their precautions, basic search and rescue diving using SCUBA equipment and complete first aid for emergency response. It has been specially designed for professional flood and disaster management e.g for national, states and districts disaster management organisations The Ac Disaster Response Team Management & Rescue Diving Training is conducted in six phases.

Training Method – Theory + Practical +Exam, Course Duration – 28 days, Minimum Age – 18 years

A **Lifesaver** is trained to rescue a drowning person while keeping himself/herself safe and is capable of giving CPR and first aid. In Pool Lifesaver training one learns safe entry into swimming pool, safe approach and safe rescue of a drowning victim. The training includes underwater search, methods of rescue, use of rescue equipment, escaping hold of a drowning person and complete first aid. Our aim is to have 'One lifesaver in every family', thus making our water bodies safe.

Training Method – Theory + Practical + Exam, Course Duration – 30 Hours, Minimum Age – 14 years, Prerequisites – 300 mtr swim in 12 min , 25 mtr underwater swim; can stand with hands up in deep water for 1 min – (eggbeater kick)

TRAINING AND WORKSHOP - MODULES

Cardio Pulmonary Resuscitation (**CPR**) is the single most useful resuscitation method for an unconscious victim. When a person's breathing has stopped, a First-aider has only 3-4 minutes to revive the victim as thereafter the brain cells would start to die, resulting in permanent damage and even death. To restore breathing before any medical help is available start CPR.

Cardio Pulmonary Resuscitation (CPR) comprises of: Expired Air Resuscitation (EAR) + External Chest Compression = CPR

Training Method – Theory + Practical + Exam, Course Duration – 3 Hours, Minimum Age – 10 years

Trauma is caused by an accident resulting in injury or wounds. Immediate assessment, providing necessary first aid before professional help arrives and handling critically injured person with knowledgeable care is called Trauma Management. Trauma Management training comprises of CPR and care of 6 -8 critical emergencies of accident victims.

Although we recommend every person to undergo a complete first-aid course comprising CPR and 20+ emergencies which will stand him/her in good stead at home, in transit or at work place, Eagle Hunter Disaster Management Services offers Trauma Management training for everyone who wishes to learn recovery and revival skills so that they can help and provide care as a first responder at an accident site.

Training Method – Theory + Practical + Exam, Course Duration – 6-7 Hours, Minimum Age – 15 years

Save a Baby training consists of general first aid steps, CPR and de-choking of an infant or child and managing other medical emergencies in children like febrile fever, seizure, croup and SIDS or sudden infant death syndrome. Of the preventive measures, keep poisons, electrical and sharp objects out of reach of baby or child.

Training Method – Theory + Practical + Exam, Course Duration – 6 Hours, Minimum Age – 16 years

In case of Cardiac Arrest, abnormal or no rhythm of heart muscles can cause the heart to stop pumping blood. Although with CPR we can maintain circulation, sometimes the heart may not start beating. **Automatic External Defibrillator (AED)** machine analyses the victim's heart rhythm and tells you how to give electric shock(s) if needed. It also guides with voice command on how to do **CPR** (for untrained persons). Thus AED helps restarting normal rhythms of the heart. During CPR, use of an oxygen kit also improves the result by providing higher percentage of oxygen to the brain, and therefore results in quicker recovery.

Training Method – Theory + Practical + Exam, Course Duration – 4 Hours, Minimum Age – 16 years

A **Lifeguard** is a person responsible to maintain safety and prevent accidents in water bodies under his/ her care. In Open Water & Beach Lifeguard training one learns how to maintain safety at ponds, lakes, rivers & beaches, take measures to prevent accidents, enforce safety rules and display flags at a beach, beach patrolling, scanning, advanced aquatic rescue skills, use of rescue equipment, rescue with motor boat/ jet ski, rescue with rescue board, beach survey for safety assessment, and complete first aid.

Training Method – Theory + Practical + Exam, Course Duration – 42 Hours, Minimum Age – 16 years and Prerequisites – 500 meters swim in 15 min , 30 meters underwater swim, can stand with hands up un deep water for 3 mins – (eggbeater kick)

TRAINING AND WORKSHOP – AUDIENCE & OUTCOMES

Crisis and Disaster Management: The Crisis and Disaster Management course offers in-depth knowledge on managing various disasters, ideal for emergency professionals, policymakers, and community leaders.

Audience and Job Roles:

- Emergency Management Professionals: Planners, responders, local, state, and federal officials
- Students and Academics in emergency management fields
- NGO and Humanitarian Workers: Disaster relief staff and volunteers
- Government Officials and Policymakers: Disaster management policy creators and implementers
- Community Leaders and Local Government: Local officials and emergency response teams
- Private Sector Professionals: Business continuity and risk management experts
- Public Health and Medical Professionals: Emergency medical responders, health coordinators
- Infrastructure and Urban Planners: Ensuring community preparedness and resilience
- Environmental Scientists: Risk assessment and mitigation experts
- Technological Experts: GIS specialists, data analysts, crisis management software developers
- Media and Communication Professionals: Crisis communication strategists, public information officers
- General Public: Individuals interested in disaster

Learning Objectives and Outcomes

Understand Types of Disasters:

- Gain insights into natural, man-made, and hybrid disasters.
- Examine historical contexts and major case studies.
- Disaster analysis and understanding.

Conduct Risk Assessment and Vulnerability Analysis:

- Identify potential risks and hazards.
- Perform vulnerability and capacity assessments.
- Develop risk mapping and scenario planning techniques.

Enhance Crisis and Disaster Preparedness:

- Disaster management planning.
- Effective crisis communications.
- Create and implement robust preparedness plans.
- Engage community and organizational preparedness.
- Conduct effective training, drills, and public awareness campaigns.

Execute Crisis and Disaster Response:

- Emergency response co-ordination.
- Understand and apply emergency response frameworks.
- Utilize the Incident Command System (ICS) for coordination.
- Manage search and rescue, medical response, and logistics.

Implement Crisis and Disaster Recovery:

- Psychological First Aid and Trauma Care
- Develop recovery plans for short-term and long-term needs.
- Support reconstruction, rehabilitation, and psychosocial recovery.
- Focus on economic recovery and lessons learned.

Workshop results in several outcomes and achievements:

- Enhanced knowledge and understanding of concepts & strategies
- Increased practical skills related to handling rescue equipment and implementing response techniques.
- Raised awareness and preparedness for potential future disasters.
